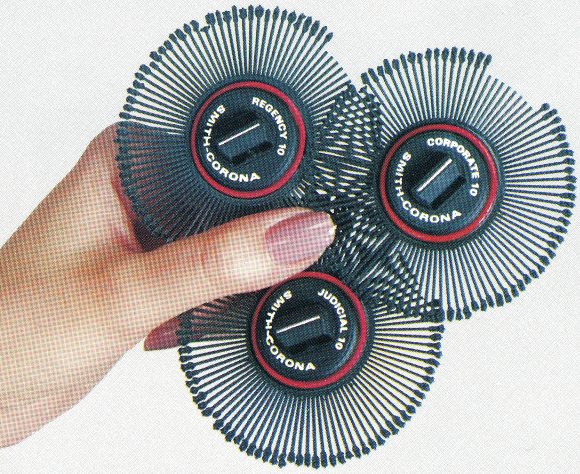
SMITH-CORONA® ULTRASONIC™

PORTABLE ELECTRONIC TYPEWRITER WITH ONE TOUCH MEMORY CORRECTION

The Ultrasonic electronic typewriter brings many of the benefits of the electronic office typewriter to your workplace at home.

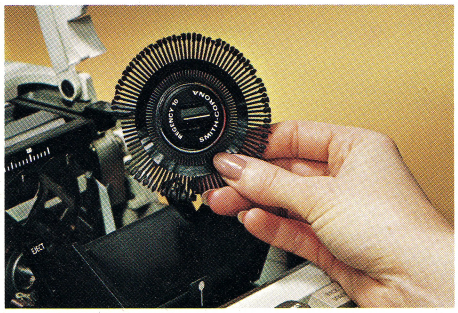
It delivers printing of exceptional quality, in a broad variety of typefaces, while reducing or eliminating many of the most time-consuming aspects of typing. It lets you remove typing errors at one touch of one key—not two or three keys. It lets you select typestyles and ribbons to match the work at hand. You can select a standard letter format at one touch, or program up to 16 tab positions. Almost everything about the Ultrasonic works at one-touch command, from its superior lift-off correction system to its high speed carrier return. Even the key-touch will feel familiar to most typists, and a friendly beep will verify your keyboard commands. With all of its electronic advantages, the Ultrasonic keyboard remains simple and needs no lengthy period of familiarization or relearning.

- **One-touch memory correction**
- **Low cost daisy printwheels**
- **Drop-in ribbon cassettes**
- **Memory speed cushion**
- **Pre-set standard letterform**
- **Up to 16 programmable tabs**
- **High-speed carrier return**
- **Stationary paper carriage**
- **Infinite line feed**
- **Outstanding print quality**
- **Double walled air-cushioned case**
- **Manufactured in U.S.A.**



SMITH-CORONA® ULTRASONIC™

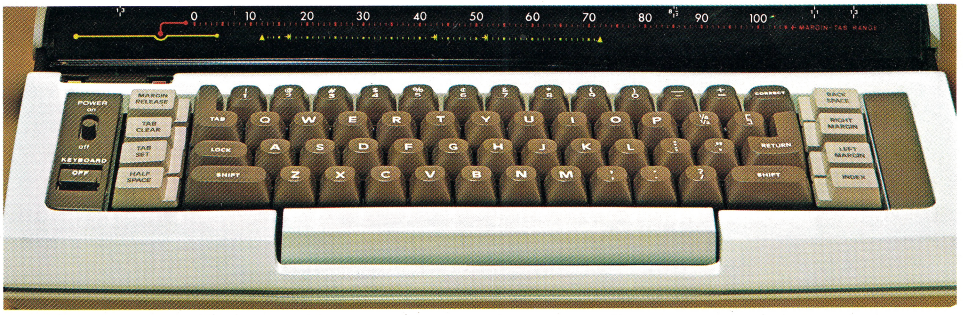
PORTABLE ELECTRONIC TYPEWRITER



MODERN DAISY PRINTWHEELS
In seconds, you can change typestyles to suit the job: traditional, contemporary, and modern. Our full type library, yours at less than the cost of some ball elements.

ONE TOUCH MEMORY CORRECTION
Removes characters or entire words. One touch; not two or three.

DROP-IN RIBBON CASSETTES
Drop in and type. Choose from office quality carbon film, correctable (lift-off) film, nylon fabric for lowest cost/character yield and multi-strike mylar . . . plus four bold colors for impact and individuality.



ULTRASONIC KEYBOARD
Microelectronics give you quick, positive response without springs and levers. Sonic / electronic system for precise character selection and positioning. Buffer memory allows high speed typing without overstrikes, dashes or omissions. Choose pre-set standard letter format or as many as sixteen tab positions. Touch-command margin settings. Touch-and-type tabulation is super quick. Time-cutting reverse tabulation, too.

There are only four major modules. The Ultrasonic has less than half the parts of a conventional electro-mechanical typewriter. This adds to its dependability and durability, and offers relative ease of service.

Specifications:
Writing Line–10.5″- 26.67 cm.
Page Capacity–13″- 33 cm.
Net weight–22.0 lbs.
Weight in case–30.0 lbs.
Shipping weight–33.8 lbs.
Power –117 volts 60 hertz;
65 watts operating,
3.23 watts idling, 1 ampere fuse.
